Course Description:

This course introduces the Western religious traditions of Judaism, Christianity and Islam in relation to the emerging field of religious ecology. This overview course identifies developments in the traditions that highlight their ecological implications into the contemporary period. In particular, it relates theological and religious concepts within the traditions to engaged, on-the-ground environmental projects. It investigates the symbolic and lived expressions in religious texts, ethics, and practices that can be defined as religious ecologies. Similarly, it identifies narratives in Judaism, Christianity, and Islam that orient humans to the cosmos, namely, religious cosmologies. This interrelationship of narratives and religious environmentalism provides pathways into the study of religion and ecology.

Course Rationale:

For many years science, engineering, policy, law, and economics were considered indispensable for understanding and resolving environmental problems. We now have abundant knowledge from these disciplines about environmental issues, but still not sufficient will to engage in long-term change for the flourishing of the Earth community. Thus, there is a growing realization that religion, spirituality, ethics, and values can make important contributions, in collaboration with science and policy, to address complex ecological issues. We will examine those contributions, acknowledging both the problems and promise of religions. In addition, we view religion and ecology amid the broader emergence of environmental humanities, namely, the examination of the roles of humans in nature through the lens of history, literature, philosophy, music, and art.

Course Format:

This six-week online course is offered for Yale students, both graduate and undergraduate. In particular, it will engage students in the School of Forestry and Environmental Studies, the Divinity School, and the Department of Religious Studies. Two credits will be offered for the course.
Course Requirements:

Students are expected to complete each week:

- 3 hours of viewing online lectures and videos
- 3 hours of reading books and articles
- Online Assignments posted to Canvas: students must post their submissions to Canvas by midnight on Sunday of each week
  - For example, Posts for Assignment 1.1 and 1.2 are due midnight October 26th in advance of the first in-class discussion of Judaism on October 29th
- Online discussions: responses and comments to classmates’ posts submitted by Tuesday at midnight each week
  - E.g., comments for Assignment 1.1 and 1.2 are due midnight October 28th in advance of the first in-class discussion of Judaism on October 29th
- Attend and actively participate in class meetings – Wednesdays 4-5pm ISPS, 77 Prospect, Seminar Rm. A001

Course Grading:

Grades will be determined on the basis of the completion and quality of course readings, assignments, participation in postings, and group discussions online and in the classroom.

The software program Canvas is equipped to record completion of online readings and assignments and allows for faculty evaluation of written work. The following areas will be assigned for completion and grade evaluation each week:

- viewing online lectures and videos (3 hours viewing each week)
- reading online materials as well as required texts
- writing assignments relating online readings and lectures (paragraph responses for posting)
- group discussions in classroom (1 hour each week)
