Journey of the Universe is TENTH in a series of a ten-year commitment on the part of Ghost Ranch to Earth-Honoring Faith: A Song of Songs. The goal of the series is to construct justice-centered, Earth-Honoring Christianities that promote interfaith efforts on common earth issues.

2017 continues a stream of immense challenges on every front—socially, politically, ecologically, and spiritually. As Thomas Berry suggested, we need a new story to reorient and ground ourselves to meet these challenges.

This story—Journey of the Universe—is bringing together the best of modern science and the humanities, including religion, art, spirituality and philosophy. This more unified perspective offers us a sense of where we have come from and how we belong. Indeed, a comprehensive story of Universe, Earth and humans will inspire the Great Work of transformation in our times.

Come explore this transformative vision together in this concluding year of the decade project on Earth-Honoring Faith.
