

# Earth Wisdom Immersion

A PARTNERSHIP BETWEEN ECOLOGY OF AWAKENING AND PACHAMAMA ALLIANCE!

*May 14 – May 18, 2018*

PRIVATE RESERVE, OCCIDENTAL, CA

**Kerry Brady and David Tucker, with guest instructor Brock Dolman**

If we are to express our fullest potential and create resilient, thriving communities for future generations, it is essential that we free ourselves from the predominant story of separation, and open to what our ancestors knew: that we are an inherent part of the larger unfolding that brought us forth. The Earth Wisdom Immersion draws from contemporary and ancient Earth-based wisdom traditions to support an embodied experience of what it is to live into our true inheritance, intimately connected to each other and the whole Earth community. Through direct engagement with that which seeks to awaken us, we will create a vibrant ecology that invites us to listen and respond to the way life speaks to each of us.

For five days we live in the rolling coastal hills of Occidental, CA in a spectacular endemic ecosystem marked by abundant wildlife, active waterfalls, coastal prairie meadows, old-growth fir and oak woodlands that dwell in serpentine soils. We will dance with council practice, solo time on the land, nature-based processes, listening meditation, inner and outer tracking, dream-work, somatic resiliency work, ceremony and other time-proven practices and processes that usher us towards dissolving our borders and discovering our deepest identity and belonging. In this mysterious and fertile ground, we gain access and insight into how our unique expression and gifts fit into the deep needs of our time.
