

Ecological Civilization in Relation to Climate Change

Lecture Schedule

Title: Ecological Civilization in Relation to Climate Change

Summary: Ecological Civilization implies moving from an industrial society that is polluting land, air, and water to an ecological civilization that provides a basis for the well-being and health of both people and the planet. How to do this in relation to climate change and carbon neutrality is a challenge that will require creative solutions, including ethical perspectives drawn from traditional Chinese thought.

Time: 14:00, June 20, 2024

Venue: Entrepreneurship Lecture Hall, Global College Students Innovation and Entrepreneurship Center, Peking University
